

Technology in the Early Years (May 2017)

In this ever changing world, we know that children of all ages are coming into contact with increasingly sophisticated technology. The skills they now have are far beyond children of the same age only a few years ago!

The Early Years Foundation Stage Framework asks us to look at how children are using technology to support their learning and to assess the skills they have developed.

We would really value your help with this, as we are aware that children may be using technology outside of nursery.

We would be most grateful if you could take a few minutes to complete the short questionnaire below and return it to you child's Key Worker. The information will be placed in their record and will also be used to help us get an overall sense of the types of technology children are using and review our current provision.

Child's name:

Key Worker:

Please indicate what best fits your view:	Yes	No	Frequently, e.g. 3 times a week or	independently	And give any comments
My child uses a computer at home (including tablet computers e.g. IPAD)					
My child plays games on a mobile phone					
My child has used a camera (this could be one on a phone)					
My child operates remote control equipment, e.g. television, DVD player					
My child has used technology to share a story, e.g. on a Kindle					
My child has communicated with family or friends using a computer, e.g. by using Skype, sending a picture or email					

Any additional information, e.g. Do they use a mouse to operate a computer? Do they know how to use a 'touch screen'?:

Thank you for taking the time to complete this questionnaire.
